

Adhesive Tape Systems

# Industrial Tapes

Adhesive Tapes  
for Industry

Engineered to Perform Better™

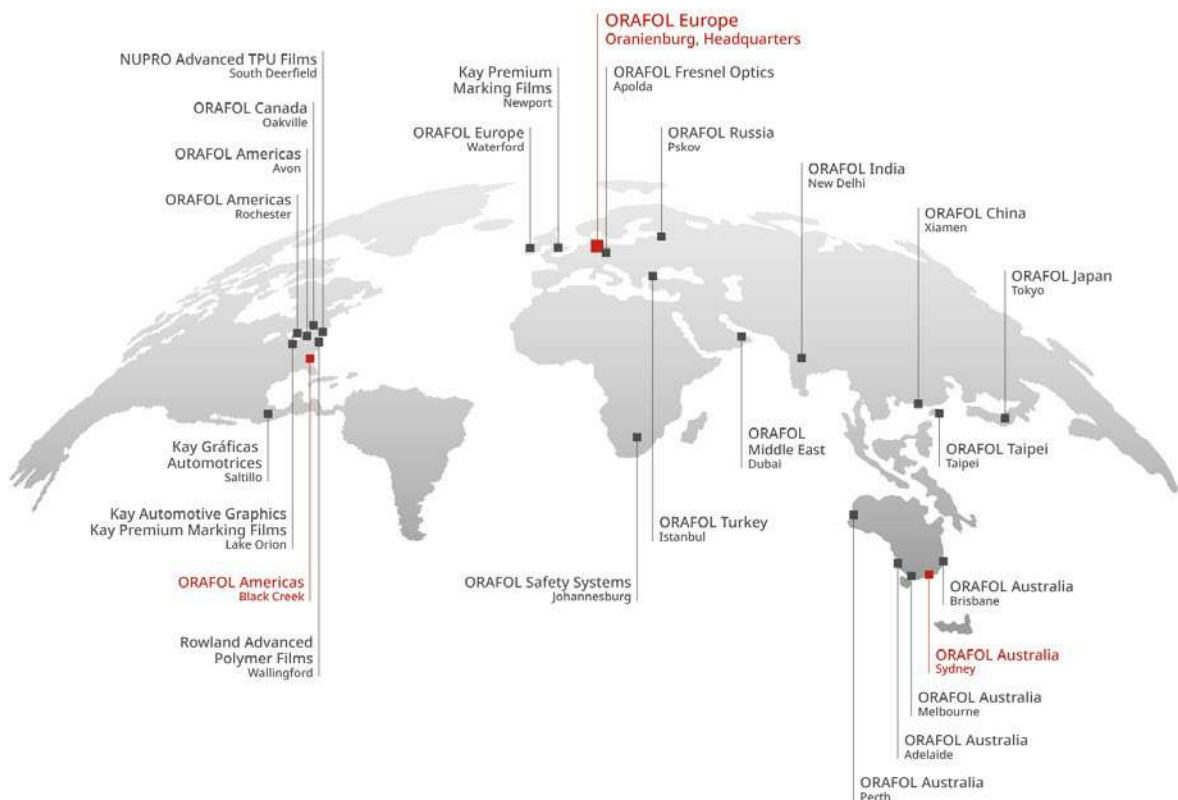

# ORAFOL Europe GmbH

## Headquarters and production facility

ORAFOL is one of the world's leading manufacturers of adhesive tape systems, innovative self-adhesive graphic films and reflective materials. The international ORAFOL GROUP is headquartered just outside the city gates of Berlin, in Oranienburg.

## ORAFOL's Worldwide Locations

# Industrial Tapes

## **Find the right solution for your needs**

The ORAFOL families of adhesive tapes are suitable for high performance applications in most industries with our main focus being automotive, electronics and mobile devices, white goods, furniture, plastics and trims as well as point of sale industries.

**Made in Germany.**

---

4-5 **Transfer Tapes**

6-13 **Acrylic double-sided adhesive tapes with film or paper carrier**

14-15 **Synthetic rubber double-sided adhesive tape**

16-19 **Double-sided adhesive tapes with foam carrier**

20 **Customer reference**

# Product Overview – Transfer tapes

	Product	Adhesive	Carrier	Thickness (Without Liner - micron)	Release Liner	Adhesive 180° peel (N/25 mm) (FINAT TM 1)		Shear strength (1 kg) (FINAT TM 8)		Loop tack (N/25 mm)
						20 min	24 h	23° C	70° C	
Pure acrylic	ORABOND® 1375  1375S (Sheets)  	A7	without	60	100 g PE paper, brown	18	20	> 1000 h	> 72 h	11
	ORABOND® 1377  1377S (Sheets)  	A7	without	120	100 g PE paper, brown	22	24	> 1000 h	> 72 h	13
Modified acrylic	ORABOND® 1325  	AM12	without	60	100 g PE paper, brown	22	25	> 500 h	> 10 h	21
	ORABOND® 1328  	AM12	without	120	100 g PE paper, brown	29	32	> 100 h	> 1 h	29
	ORABOND® 13161  	 AM16	without	80	90 g paper, brown	22	23	> 400 h	> 72 h	20
	ORABOND® 1368WA  	AM2 glass fibre filled	without	50	100g PE-liner, white	22	27	> 400 h	> 6 h	20
	ORABOND® 1370  	AM2 glass fibre filled	without	90	90 g paper, brown	25	28	> 400 h	> 6 h	22

Temperature resistance (° C)	Application-specific characteristics (4 = highly recommended, 0 = not recommended)					Prime applications
	UV and age resistance	Short term temperature resistance	Water resistance	Solvent and plasticiser resistance	Adhesion to low-surface energy	
-40 to +170° C	4	4	4	4	1	For the production of metal, polycarbonate and other plastic fascias, nameplates and decals; used for lamination of membrane switch assemblies and other electronic component mounting in mobile telephones and for other applications that require an extremely high shear strength and temperature resistance; <b>UL 969 listed.</b>
-40 to +170° C	4	4	4	4	1	For the production of metal, polycarbonate and other plastic fascias, signs, nameplates and decals; used for lamination of membrane switch assemblies and other electronic component mounting in notebooks, mobile telephones and for other applications that require an extremely high shear strength and temperature resistance; <b>UL 969 listed.</b>
-40 to +150° C	4	3	3	3	4	For low energy surface lamination: for foams and materials that require an extremely high shear, adhesive strength and temperature resistance, excellent resistance to UV radiation, extreme temperatures, chemicals, solvents and humidity. <b>UL 969 listed.</b>
-40 to +150° C	4	3	3	3	4	The ideal bonding solution for low surface energy coatings and plastics. It offers a high initial adhesion, and works well also on rough, structured or stamped surfaces. It is the product of choice when working with polypropylene sheets, polycarbonate sheets and filled polypropylene. <b>UL 969 listed.</b>
-40 to +140° C	4	4	4	2	3	Suitable for foams (e.g. PVC, PP, PE), polyester, PVC as well as for general bonding of metal, plastic plates and molds, even on highly curved surfaces. When applying transfer tape it is recommended that it is rolled at the smallest angle possible.
-40 to +150° C	4	3	3	3	3	PVC & polyolefin foam lamination, leaded windows, metal and plastic name- plates and fascia panels, production of special labels and decals in electronic industries; for low energy surfaces.
-40 to +150° C	4	3	3	3	4	Foam lamination, metal and plastic nameplates, security glazing tapes, decals in electronic industries; for rough surfaces.

\* 914 x 610 mm, 610 x 457 mm, 457 x 305 mm

# Product Overview – Acrylic double-sided adhesive tapes with

	Product	Adhesive	Carrier	Thickness (Without Liner - micron)	Release Liner	Adhesive 180° peel (N/25 mm) (FINAT TM 1)		Shear strength (1 kg) (FINAT TM 8)		Loop tack (N/25 mm)
						20 min	24 h	23° C	70° C	
Modified acrylic	ORABOND® 1194  	AM10	57 micron PP	215	90 g paper, brown	25	28	> 600 h	> 10 h	28
	ORABOND® 1195  	AM10	12 micron PET	130	90 g paper, brown	23	25	> 600 h	> 10 h	28
	ORABOND® 119508  	AM10	12 micron PET, black	130	90 g paper, brown  <b>Also available with TM liner</b>	23	25	> 600 h	> 10 h	28
	ORABOND® 119708  	AM10	12 micron PET, black	210	90 g paper, brown	30	32	> 600 h	> 10 h	28
	ORABOND® 3334	AM10	12 micron PET, transparent	190	80 micron PP film, red	29	32	> 400 h	> 6 h	28
	ORABOND® 13164	AM16	12,7g/m <sup>2</sup> paper tissue	160	90g paper, brown	26	27	> 1000 h	> 72 h	25

## film or paper carrier

Temperature resistance (° C)	Application-specific characteristics (4 = highly recommended, 0 = not recommended)					Prime applications
	UV and age resistance	Short term temperature resistance	Water resistance	Solvent and plasticiser resistance	Adhesion to low-surface energy	
-40 to +120° C	4	3	4	3	3	Cable trunking, furniture trim, general plastic component bonding and mounting, lamination of automotive mirrors, high temperature splicing.
-40 to +160° C	4	4	4	3	3	Electronic applications, stamped parts, lamination of signs, covers, scales, metal and plastic films; recommended for lightly structured surfaces.
-40 to +160° C	4	4	4	3	3	Electronics, mobile telephone gaskets.
-40 to +160° C	4	4	4	3	3	Electronics, mobile telephone gaskets, high temperature splicing.
-40 to +160° C	4	4	4	3	3	Secure attachment of truck and car mirrors in plastic housings, trims, covers and cable trunks. Recommended for LSE, rough and structured surfaces.
-40 to +140° C	4	4	4	2	3	For low-energy surface lamination: Foam lamination (e.g. PVC, PP, PE), polyester, metal, plastic plates and molds. Even for highly curved surfaces.

# Product Overview – Acrylic double-sided adhesive tapes with

## film or paper carrier

Temperature resistance (° C)	Application-specific characteristics (4 = highly recommended, 0 = not recommended)					Prime applications
	UV and age resistance	Short term temperature resistance	Water resistance	Solvent and plasticiser resistance	Adhesion to low-surface energy	
-40 to +160° C	4	4	4	3	4	For signs, decorations, front plates displays, metal and PVC films that require a high shear and adhesive strength as well as high temperature resistance. As fixing aid in sail production and for attachment of bars and trims. Also for low-energy surfaces.
-40 to +160° C	4	4	4	3	4	PVC extrusions, furniture trims, splicing for high temperature operations, splicing of difficult materials, intermediate thickness version of 1397PP.
-40 to +70° C	4	2	4	3	4	Sign making, digital graphics mounting, extrusion applications, lamination of automotive mirrors and white goods components; for rough surfaces.
-40 to +80° C	4	2	4	3	4	Furniture trims, cable trunking, lamination of automotive mirrors; for rough surfaces.
-40 to +160° C	4	4	4	3	4	Sign boards, general fixing, sail making tapes, electronic component mounting, special labels; thinner version of 1397.
-40 to +140° C	4	3	3	3	4	Foam lamination, sign boards, general fixing; for smooth or lightly porous surfaces, thinner version of ORABOND® 1399.
-40 to +160° C	4	4	4	3	4	PVC extrusions, furniture trims, splicing for high temperature operations, splicing of difficult materials, lamination of automotive mirrors.
-40 to +160° C	4	4	4	3	4	PVC extrusions, furniture trims, splicing for high temperature operations, splicing of difficult materials, production of sails for sailboards.
-40 to +160° C	4	4	4	3	3	Lamination of signs, covers, metal and plastic films, white goods component fixing, electronic products; for even surfaces.
-40 to +140° C	4	3	3	3	4	High performance fixing, mounting of roller blinds, point of sale, foam lamination, splicing of difficult materials; for rough surfaces.
-40 to +140° C	4	4	3	4	3	For splicing of paper and boards where there is a requirement for a visible splice or automatic splice detection using optical devices.

# Product Overview – Acrylic double-sided adhesive tapes with

## film or paper carrier

Loop tack (N/25 mm)	Temperature resistance (° C)	Application-specific characteristics (4 = highly recommended, 0 = not recommended)					Prime applications
		UV and age resistance	Short term temperature resistance	Water resistance	Solvent and plasticiser resistance	Adhesion to low-surface energy	
25	-40 to +160° C	4	4	4	3	4	PVC extrusions, furniture trims, splicing for high temperature operations, splicing of difficult materials, intermediate thickness version of 1397PP.
17	-40 to +120° C	4	3	3	3	3	For high performance foam lamination, lamination of paper or wood veneers to wood and MDF boards.
open side: 10 covered side: 3	-40 to +120° C	4	2	2	3	2	Recommended for use where a permanent bond to the primary substrate is required, with a "post-note" low tack bond to the other substrate (open side permanent bonding); for window protection pads and removable splicing; easy and residueless removal from covered side.
open side: 10 covered side: 6	-40 to +120° C	4	2	4	4	1	Recommended for use where a permanent bond to the primary substrate is required, with a medium tack temporary bond to the other substrate (open side permanent bonding); residueless removal from covered side.
open side: 20 covered side: 6	-40 to +120° C	4	2	2	3	2	Especially suitable as a self-adhesive medium for different materials. Ideal for situations where residueless removal is required.
open side: 10 covered side: 3	-40 to +120° C	4	2	2	3	2	Special version of ORABOND® 1331. Intended use in label conversion of smart card and credit card applications. Easy and residueless removal from covered side.
8	-40 to +170° C	4	4	4	4	1	Lamination of digital printed signs, window roller blind attachment; recommended for thin materials with even surfaces.

# Product Overview – Acrylic double-sided adhesive tapes with

## film or paper carrier

Temperature resistance (° C)	Application-specific characteristics (4 = highly recommended, 0 = not recommended)					Prime applications
	UV and age resistance	Short term temperature resistance	Water resistance	Solvent and plasticiser resistance	Adhesion to low-surface energy	
-40 to +80° C	4	2	2	2	1	Mounting of blankets in offset printing, fixing of dry sand paper to grindstones, synthetic profiles and rubber mouldings; for rough and structured surfaces.
-40 to +100° C	4	2	2	2	2	Good APEO-free distributor grade used for multiple end applications, rubber, leather, textile and foam lamination, splicing of paper, cardboard and film.
-40 to +120° C	4	2	2	2	2	APEO-free economy foam lamination product: for lamination of cellular rubber, small pore and impregnated foams, felt fabrics and other smooth and slightly rough surfaces; highly resistant against ageing and plasticisers.
-40 to +120° C	4	2	2	2	3	APEO free, for lamination of cellular rubber, open-pore and impregnated foams, felt-fabrics and other rough, open surfaces; highly resistant against ageing and plasticisers.
-40 to +140° C	4	2	2	2	3	Extremely flexible APEO free tape for lamination of cellular rubber and EPDM; also for textiles and wood, open-pore and impregnated foams, cellular PE, soft PVC and other rough, open surfaces. Suitable for applications where resistance to high temperatures, ageing and plasticisers are needed.
-40 to +140° C	4	2	3	3	3	Foam lamination in refrigeration evaporator mounting; application in a broad temperature range.
-40 to +140° C	4	2	2	2	4	Adhesion of cellular rubber, textiles, wood, open-pore and impregnated foams, cellular polyethylene, soft PVC and other rough, open surfaces.
-40 to +140° C	4	2	2	2	2	For bonding of cellular rubber, textiles, wood, open-pore and impregnated foam, cellular PE, soft PVC and other rough and open surfaces.

# Product Overview – Synthetic rubber double-sided adhesive

	Product	Adhesive	Carrier	Thickness (Without Liner - micron)	Release Liner	Adhesive 180° peel (N/25 mm) (FINAT TM 1)		Shear strength (1 kg) (FINAT TM 8)		Loop tack (N/25 mm)

## tapes

Temperature resistance (° C)	Application-specific characteristics (4 = highly recommended, 0 = not recommended)					Prime applications
	UV and age resistance	Short term temperature resistance	Water resistance	Solvent and plasticiser resistance	Adhesion to low-surface energy	
-40 to +70° C	1	1	4	1	4	Lamination of foams, boards, profiles, metal, paper and hard PVC, high tack and immediate bonding.
-40 to +70° C	1	1	4	1	4	For general bonding and point of sale applications; for closed cellular foams and rubber for even surfaces, economy version of ORABOND® 1453.
-40 to +70° C	1	1	4	1	4	For extruded magnets, furniture trim and security bag seals; PP liner version for spools ORABOND® 1453LT.
-40 to +70° C	1	1	4	1	4	Foam lamination, general bonding; tissue carrier version of ORABOND® 1453.
-40 to +70° C	1	1	4	1	4	Lamination of closed cell foams, PE and hard PVC, general fixing of wood, metal and glass in internal applications; for rough and even surfaces.
-40 to +80° C	1	2	4	1	4	Adhesive medium for smooth surfaced materials (e.g. metal, polystyrene, glass) as well as for hard PVC and cellular polyethylene. Also used for lamination and sealing of mineral fibre insulation.
-40 to +70° C	1	1	4	1	2	For general fixing of wood, metal and glass in internal applications.
-40 to +60° C	1	1	4	1	4	Lamination of impregnated foams and rough materials in internal applications.
-40 to +70° C	1	2	4	1	4	For bonding to EPDM rubber, for refrigeration evaporator mounting.
-40 to +70° C	1	2	4	1	4	For bonding on smooth surfaces like metal, polystyrene, glass and hard PVC; used extensively in refrigeration market for mounting of evaporator plate panels.
-40 to +100° C	1	2	4	1	4	EPDM extrusions, impregnated foams, lamination of cellular rubber, filter mounting; high rip-resistance and low elongation.
-40 to +100° C	1	2	4	1	4	EPDM extrusions, impregnated foams, lamination of cellular rubber, filter mounting; high rip-resistance and low elongation.

## carrier

Temperature resistance (° C)	Application-specific characteristics (4 = highly recommended, 0 = not recommended)					Prime applications
	UV and age resistance	Short term temperature resistance	Water resistance	Solvent and plasticiser resistance	Adhesion to low-surface energy	
-40 to +95° C	4	3	4	4	2	Used for the installation of mirrors in the furniture and sanitary industry. For adhesion of aluminium, steel and GRP outer skins during the construction of truck containers. For the fixing of panels and handles in the appliance and electrical industry.
-40 to +95° C	4	3	4	4	2	Used for the installation of mirrors in the furniture and sanitary industry. For adhesion of aluminium, steel and GRP outer skins during the construction of truck containers. For the fixing of panels and handles in the appliance and electrical industry.
-40 to +95° C	4	3	4	3	2	Mounting of window bars, signs, extrusion profiles and mirrors, for solar panel production; complies with FIRA requirements. <b>UL 746C listed.</b> Certificate: Mirror mounting according to TÜV/Rheinland/LGA guideline, Report no. 21267939_001
-40 to +90° C	4	3	4	3	2	Mounting of mirrors, window bars (muntin bars), trims, panels and handles in furniture production as well as signs, displays and product prototypes in the advertising industry; for lamination of aluminium, steel and GRP outer skins during the construction of truck containers.
-40 to +95° C	4	3	4	3	2	Sister product to our famous ORAMOUNT® 1810, with black foam carrier for solar panel frame bonding where a black bond line is preferred; also for mounting of furniture trim, mirrors and panels where dark wood is used. <b>UL 746C listed.</b>
-40 to +95° C	4	3	4	3	2	Optical lens grinding pads, automotive badge and trim mounting, wheel weights.
-40 to +95° C	4	3	4	3	2	Optical lens grinding pads, automotive badge and trim mounting, wheel weights.
-40 to +95° C	4	3	4	3	2	Fixing of badges, trims, panels and other fixings in the automotive industry.
-30 to +70° C	1	1	4	1	4	General purpose fixing and high shear application, plastic hooks and hangers, mirror mounting; complies with FIRA requirements, for rough surfaces.
-30 to +70° C	1	1	4	1	4	General purpose fixing and high shear application, plastic hooks and hangers; for apolar surfaces.
-30 to +70° C	1	1	4	1	4	General purpose fixing and high shear application, plastic hooks and hangers, mirror mounting; complies with FIRA requirements; for apolar surfaces.
-30 to +70° C	1	1	4	1	4	For fixing of boards, displays and for a variety of different household applications. A universal, economical product. Also suitable for rough and structured surfaces.

# Product Overview – Double-sided adhesive tapes with foam

	Product	Adhesive	Carrier	Thickness (Without Liner - micron)	Release Liner	Adhesive 180° peel (N/25 mm) (FINAT TM 1)		Shear strength (1 kg) (FINAT TM 8)		Loop tack (N/25 mm)
						20 min	24 h	23° C	70° C	
Modified acrylic	ORABOND® 1807 	AM2	PE foam, black, 2.0 mm	2.1	90 g paper, blue	> 19	> 19	> 300 h	> 6 h	28
	ORABOND® 1808 	AM2	PE foam, black, 0.5 mm	0.6	90 g paper, white	> 20	> 20	> 300 h	> 6 h	30

## carrier

Temperature resistance (° C)	Application-specific characteristics (4 = highly recommended, 0 = not recommended)					Prime applications
	UV and age resistance	Short term temperature resistance	Water resistance	Solvent and plasticiser resistance	Adhesion to low-surface energy	
-40 to +80° C	4	3	4	3	3	For installation of even surfaced spray cast and extruded plastic parts such as panels, bars and signs, as well as plexiglas mirrors for interior fit-outs and displays. For use as an adhesive medium for hooks, handles and dispensers on even surfaces.
-40 to +90° C	4	3	4	3	3	For fixing of trims, badges, panels, letters, emblems and other external fixings in the automotiveaftermarket industry.
-40 to +80° C	4	3	4	3	3	General mounting applications, lamination of plastic hooks, plastic hangers, cable trunking and furniture profiles; for interior application. <b>UL 746C listed.</b>
-40 to +80° C	4	3	4	3	3	Point of sale, general fixing and mounting, e.g. cable trunking, displays, signs; for interior application.
-40 to +100° C	4	3	4	3	3	For bonding of smooth spray cast and extruded plastic parts (e.g. panels, bars, signs, plexiglass mirrors for interior fit-outs and displays). For even surfaces. Economic version of 1812.
-40 to +80° C	4	3	4	3	3	Sister product to ORAMOUNT® 1812 with yellow PP film liner, for bonding of plastic and metal extrusion profiles and plastic parts, e.g. panels, bars, signs, plexiglass mirrors and displays; high initial adhesion and shear strength. <b>UL 746C listed.</b>
-40 to +80° C	4	3	4	3	3	Metal pins, plastic hooks and hangers, cable trunking, furniture profiles, exhibition and point of sale.
-40 to +80° C	4	2	4	3	3	For bonding and installation of a variety of materials such as metals, plastics, glass and ceramics. For durable adhesion of plastic mouldings.
-40 to +100° C	4	2	4	3	3	Furniture profiles, window seals, window bars, displays; for even surfaces.
-40 to +80° C	4	3	4	3	3	Automotive after market trim and badge attachment, window bars, lamination of metal, plastics, glass and ceramics.
-40 to +80° C	4	3	4	3	3	Point of sale, general fixing and mounting, e.g. cable trunking, metal, plastics, glass and ceramics lamination.
-40 to +80° C	4	3	4	3	3	Mounting of mirrors, signs, window bars, and general purpose mounting.
-40 to +90° C	4	2	4	3	3	For mounting and fixing of window profiles and seals where the 3 mm product is required, for fixing of materials such as metal, plastics, glass, ceramics; good adhesion on difficult surfaces.
-40 to +80° C	4	3	4	3	3	For use in applications where the foam is used as a temporary fixing or gasket. The adhesive on the liner side of this product is clean removable from most surfaces.
-40 to +95° C	4	3	4	3	7	Durable fixing of trims, panels, letters, emblems, and other external fixings in the automotive aftermarket industry.
-40 to +95° C	4	3	4	2	3	Ideal as an adhesive medium for materials that require an extremely high shear and adhesive strength as well as high temperature resistance. It is suitable for foams (e.g. PVC, PP, PE), polyester, PVC as well as for general bonding of metal, plastic plates and molds.

## Standard products

We offer many products in extra long slit rolls or in spool wound format or as fingerlift spools (extended liner format). Please contact your sales correspondent for detailed offers and samples.

The minimum order for standard products is 1 x 50 m log.

Available slit roll width: 12, 15, 19, 25, 30, 38, 50, 60, 75, 100 mm.

### Adhesives

Name	Type	Properties & Features
A1	pure acrylic	High shear adhesive with excellent resistance to high temperatures, solvents, humidity and outdoor exposure.
A4	pure acrylic	High clarity grade with excellent polycarbonate and acrylic adhesion.
A7	pure acrylic	High shear adhesive with excellent high tack, excellent adhesion on all high-energy surfaces.
AM1	modified acrylic	Medium shear adhesive with excellent adhesion to most foams where plasticisers and other impregnates are used.
AM2	modified acrylic	High shear, high tack adhesive with excellent balance of properties for use in high performance bonding applications. This product features good adhesion to low surface energy plastics.
AM5	modified acrylic	Ultra removable adhesive with excellent no-build adhesion to most surfaces.
AM6	modified acrylic	Version of AM5 with increased adhesion and good removability.
AM7	modified acrylic	High shear and high tack adhesive with good temperature performance for paper and board splicing. The adhesive is coloured red for visual splicing applications.
AM10	modified acrylic	Higher shear version of AM2 for high temperature and electronics applications.
AM12	modified acrylic	Excellent high tack and outstanding adhesion on high-energy and especially on low-energy surfaces.
AM13	modified acrylic	Alternative version of AM12 with increased adhesion.
AM16	modified acrylic	High shear adhesive for high performance adhesive applications with good adhesion to LSE plastics. Excellent anti-repulsion properties to prevent edge-lifting on curved LSE surfaces.
AD1	modified dispersion acrylic	General purpose adhesive with medium tack and a good initial and final adhesion
AD4	modified dispersion acrylic	High performance acrylic adhesive, specially designed for bonding applications and white goods.
AD6	modified dispersion acrylic	Low fogging version of AD7
AD7	modified dispersion acrylic	Aggressive tack for most foam bonding applications where good resistance to ageing and solvents is required.
AD14	modified dispersion acrylic	High performance, flame retardant adhesive
AD16	modified dispersion acrylic	High performance adhesive with good balance of properties, a universal solution for most bonding applications
RL2	synthetic rubber	High shear solvent rubber with good adhesion to low surface energy plastics.
SR1	synthetic rubber	High tack adhesive with good adhesion to EPDM foams.
SR5	synthetic rubber	General purpose high tack adhesive for splicing and lamination applications.
SR6	synthetic rubber	Economy adhesive for general purpose bonding.
SR7	synthetic rubber	High tack adhesive with good adhesion to cellular polyolefin foams.
SR10	synthetic rubber	General purpose adhesive with good balance of adhesion and tack for foam and felt lamination.
SR13	synthetic rubber	General purpose adhesive with good balance of adhesion and tack.
SR14	synthetic rubber	High tack adhesive with good resistance against plasticisers, particularly suitable for EPDM foam profiles.

### Liners

Liner	Type	g/m <sup>2</sup>	Colour
Standard (for acrylics)	siliconised glassine	90	brown
Standard (for hot melts)	siliconised glassine	80	brown
09	siliconised glassine	80/100	white
for AM2 foams	siliconised glassine	90	blue
	siliconised glassine	90	white
W	siliconised PE coated kraft	140	white
WA	siliconised PE coated kraft	100	white
A1 foams	siliconised PE coated kraft	140	blue
K3	siliconised polypropylene film	100	yellow
L5	siliconised polyethylene film	115	dark green
PP film	siliconised polypropylene film	80	transparent salmon
PET film	siliconised polyester film	70	clear

### Carriers

Carrier	Type	micron	Colour
fleece	non-woven paper tissue	35	white
PP fleece	polypropylene fleece	35	white
PET	polyester film	12	clear
PET	polyester film	12	black
PP film	polypropylene fleece	18/28/57	clear
GI	scrim	-	white
Hard PVC	hard PVC film	38	white
PVC	soft PVC film	90	white
special scrim PET	diamond		blue
glass scrim	glass scrim		white
textile	rayon cloth		white
PE	PE foam	various	white/black
