

A green t-shirt is laid flat on a light blue background with a pattern of small, darker blue circles. The t-shirt features a white logo consisting of a stylized lowercase 'm' with a teardrop shape to its left. Below the logo, the text 'MagnaColours®' is printed in a sans-serif font. Underneath this, the words 'THE RANGE' are printed in a bold, sans-serif font, flanked by two horizontal lines. At the bottom of the graphic, the words 'ULF' and 'ultra' are printed in a bold, sans-serif font, with 'ultra' in a slightly italicized style.

MagnaPrint® Range

is a complete line of waterbased inks designed to meet all the requirements of the screen printer. From formaldehyde free discharge to contemporary fashion effects. **MagnaPrint® brings together superior technology, worldwide distribution and the best technical support in the business.**

ULF *ultra*

Patented Formaldehyde Free Discharge System

MagnaPrint® ULF Ultra Range products are manufactured free from formaldehyde and use a completely formaldehyde free activator which ensures no formaldehyde is generated during processing and prints meet the requirements of **Oekotex 100 Class 1 <20ppm formaldehyde** – straight from the dryer.

MagnaPrint® Discharge Base ULF Ultra

MagnaPrint® Discharge Blending White ULF Ultra

MagnaPrint® Discharge Super White ULF Ultra

MagnaPrint® Activator M

Suitable fabrics are discharged with excellent results. Addition of **MagnaPrint® Eco Pigments** results in brilliant colour development and very soft handle.

- ◆ No formaldehyde created during discharge process
- ◆ No harmful or distracting odours
- ◆ Garments can be worn immediately after printing – without washing or warnings
- ◆ Super soft finish with excellent colour fastness and durability
- ◆ PVC, Phthalate, APEO and formaldehyde free formulations. Meets all key international environmental standards
- ◆ Superb discharge colour development on suitable garments
- ◆ Low viscosity inks print easily on manual and automatic presses

MagnaPrint® Plascharge is a discharge base that can be mixed 50/50 with Plastisol or high solids water based inks to create a Hybrid discharge system or may also be used as a Discharge Underbase and overprinted. It can be activated with Activator M for formaldehyde free printing or with Activator AB if formaldehyde free is not a requirement.

All information is given in good faith but without warranty. They do not release you from testing our products as to their suitability for the intended processes and uses.
