

Description

ORACAL® UV10 is a window film series produced for interior design. It has 38 micron thickness. Interior design window films are developed as an affordable solution for creating decorative areas and privacy.

Pattern

Frosted stripes of 5mm and 35mm in width, decorative window film

Release Paper

Silicone-coated transparent polyester on one side

Adhesive

Acrylic copolymer, transparent

Area of Use

The areas of use of ORAFOL decorative window films are quite extensive. Use in areas such as glass doors, showcases, room dividers, glass surfaces in meeting rooms and airport waiting rooms is recommended. They are also suitable for areas where you may need them for privacy, such as bank windows, laboratory or hospital windows.
